BUSINESS BULLETIN

New Distribution Company for Northern Americas Market

01.08.2009

TAMUZ is pleased to announce its new distribution channel for the North American market. From August 1st 2009, TAMUZ Broadcast Trading, Inc., (fully owned by TAMUZ Germany) will coordinate all sales and marketing efforts for the United States, Mexico and Canada from its headquarter in Helena, Montana.

Tamuz is expanding -- adding to the well-known line of TAMUZ monitors, the company extends its merchant portfolio by adding signal processing products made by the French manufacturer Tcube. Three major hardware units can be combined with a variety of software applications such as: VBI inserter, Color Corrector, LUT Generator, HDV Converter or as Logo/Clock Generator.

Tim McNany, Vice President of sales and marketing, and his team operates from the east coast office in Maplewood, NJ. Reachable by a toll free number; 877 - TAMUZ 77. The products are stored at the new warehouse, which is located close to the Newark airport where the imported goods from Germany are received.

For service and support, TAMUZ forged relationships and signed contracts with well established companies and engineers experienced in the repair of high quality broadcast equipment. Service centers are located on the east and the west coast to serve the clients locally. A 24/7 accessible RMA service system (rma.tamuz.tv) coordinates the communication between customers, technicians and engineers at the support center in Germany.

Latest development out of the German R&D lab is the new member in the GREY OWL family. The first small size high-resolution 1024x600 px widescreen monitor equipped with a 9" TFT illuminated by a LED backlight system. As version FLM 109W SL fulfills the Class-2 recommendation at low light output and high contrast ratio listed in EBU t3320/3325.

All information about existing and new products are available online;
www.tamuz-usa.com for TAMUZ Broadcast Monitors
www.tamuz-broadcast.tv for equipment made by TAMUZ and Tcube.

At least the information to the market, that Mr. David Hartmann from the former master distributor TAMUZ USA, LLC from Chester NJ is not related with TAMUZ anymore and is not authorized to act in the name of TAMUZ.
